

Creating a Safer Workplace

Drug and Alcohol testing will support your current WHS practices and help reduce workplace incidents.

Drake International's Drug and Alcohol Indicative Testing program can assist you in detecting issues before a workplace incident occurs. The test takes approximately 15 minutes to complete and all results and records remain confidential between Drake International and your organisation.

The Benefits of Workplace Drug and Alcohol Indicative Testing:

- Identify workers that may be working under the influence of drugs and/or alcohol
- Minimise the potential of workplace incidents
- Reduce cost by avoiding the need to manage a workplace incident
- Assist in supporting your company's Work Health and Safety program
- Increase the awareness around drugs and alcohol in the workplace
- Avoid the unnecessary need for a more expensive evidentiary test where negative results are achieved
- Reduce cost associated with absenteeism, lost productivity and potential property damage
- Gain the ability to provide evidence in the event of a possible policy breach

.....

Protect your employees and your bottom line. Takes steps today to make your organisation a healthier and safer place to work.

Remember, prevention is always better than a cure!
