Incitec Pivot Limited Gibson Island Site Visit Wednesday 27 July 2016

When: **Wednesday 27 July 2016**

What: Gibson Island makes up one half of IPL's Brisbane Operations. The other being its Pinkenba site. Between the two, Incitec Pivot run two Product Distribution Centres (PDCs) and manufacturing plants. Gibson Island is also the headquarters of their Dyno Nobel Asia Pacific business. Gibson Island PDC despatches approximately 630,000 tonnes of fertilisers each year. The Gibson Island site also has a 160tpd Liquid Carbon Dioxide Plant that supplies a significant proportion of the liquid CO² for Queensland and is the main source of CO² for the use in the manufacture of carbonated soft drinks in Qld and northern NSW.

The tour will provide attendees with an overview of IPL and the Manufacturing/Product Distribution process at Gibson Island. IPL will run visitors through two of their Product Distribution Centres and explain the process of loading/unloading stock and how this feeds into the broader supply chain process. They will also run through their Pre-start and tiered meeting structure, which is an example of the BEx (Business Excellence) methodologies used by the company.

Where: Incitec Pivot Limited Gibson Island Site, 282 Paringa Road, Gibson Island, Murarrie

Cost: Members - Free to attend
