SCLAA NSW Breakfast Seminar

Slotting in the age of Automation

Wednesday, 4 September 2019

Interactive breakfast seminar looking at achieving maximum productivity in the Warehouse through slotting without the capital investment requirements of Automated Systems.

Date: Wednesday, 4 September 2019

Time: 08:00am - 10:00am

Venue: B Dynamic Logistics – BDL
1 Aristida Close, Kemp's Creek.

Cost: SCLAA Members - No charge
Non Members - \$30.00

In conjunction with Fuzzy LogX and US Based Slot 3D, SCLAA is pleased to offer an informative breakfast seminar covering the following topics in an interactive format:

- The current state of Automated Warehousing
- Warehouse Slotting Software features and technology
- An interactive demonstration of 3D Slotting

REGISTER NOW

We will be joined by Eric Somheil a seasoned warehousing slotting engineer who will be available for questions after the seminar.

After attending this event you can expect to increase your understanding of Automated Systems as well as how to get Automation-like productivity gains through slotting.

Presenter: Eric Somheil

Eric Somheil is the Vice President of Engineering Services for Slot3D. He works with Distribution teams to reduce their direct labor costs worldwide.

Eric knows that familiarity breeds complacency and the Entrepreneurial spirit is alive in Slot3D. Using advanced Algorithms, world class displays, and introducing Artificial Machine learning, his team is changing the slotting experience.

Eric Somheil has worked for 25 Years as DC Manager, Staff Engineer and Technology Manager for Supervalu, Safeway, Penske and XPO. He has run over 60 DCs in his career.

He is also a certified MSD Engineer and Green Belt in Lean - 6Sigma

Registrations close on Friday, 30 August 2019
