AUTOMATED DC SITE TOUR!

WHAT IS IT?

The SCLAA is giving you the opportunity to view one of Australia's most automated facilities, the Distribution Centre for Catch Group. Since launching in Australia in 2006, Catch have become one of Australia's leading eCommerce brands. Incorporating identifiable names like Scoopon, Catch.com.au and Pumpkin Patch, Catch have a range of over 13,000 branded products.

Catch's facility in Truganina, was part of a \$15million investment back in 2015 and now serves as a key example of automation in Australian Warehousing. Catch's fleet of Robots allows them to serve over 10,000 orders per day. This tour will give rare access to the Catch Warehouse, and allow attendees to witness the fleet at work.
