The Chartered Institute of Logistics Australia (CILTA), Victorian Section and the Australian Chamber of International Trade (ACIT) are co-delivering the 5th Logistics Conversation Event in Melbourne. The event is a seminar / Q&A program that will be discussing the important role of technologically advanced Multi-Modal Transport systems in this country, and the role of the Victoria International Container Terminal (VICT), in significantly lifting Melbourne's and Australia's import / export capability.

Speakers for the night will include representatives from the VICT and experts in the track and trace capability of intermodal cargo throughout Australia and the world.

Attendees will learn about the Port of Melbourne expansion plan and the overall impact this will have on the local and international economies within our region. With significant investment of over \$USD 100 million, the VICT are building significantly improved and technologically advanced infrastructure to further build Australia's logistics capability.

This capability will enhance our our handling of over 3 million TEU's per annum through the Port of Melbourne and this development is in line with other port capability expansion in the south east pacific region and throughout Asia. In light of free trade negotiations and agreements in our region, we need to develop all our port operations and multi-modal transport infrastructure to ensure our competitiveness.

Come along to listen and learn from Industry professionals and business representatives from the Victorian Business Community. The format of the evening includes; presentations, discussions and networking opportunities with your peers and fellow logisticians.
