About TOLL

Toll Group, part of Japan Post, is the Asia Pacific region's leading provider of integrated logistics services, employing approximately 40,000 people across 1,200 locations in more than 50 countries. Toll's unrivalled capability and global reach helps provide customers with logistics solutions capable of serving the most comprehensive global supply chains.

Toll Global Express is a division of Toll and provides document, parcel, courier and express freight delivery services for the consumer and business sectors within Australia and globally. This includes urgent and specialised logistics using Toll's extensive network of couriers.

Purpose of the Site Visit

The tour will be at the Toll IPEC facility at Bungarribee which offers the latest in industry-leading warehouse fit-outs, designed with safety front of mind. The tour will showcase:

- **Safety:** Embedded in Toll's values is the belief that all injuries are preventable and everyone has the right to go home safely. This belief forms the framework to the way business is done. It is articulated in our global Think safe. Act safe. Be safe. strategy, which aims to develop a consistent and systematic approach to leading and managing health and safety across our business.
- **World Class Facilities:** Toll's sortation and handling technology is unmatched anywhere in the Southern Hemisphere. The facilities and infrastructure enable Toll to achieve international best practice standards in express freight delivery. We have the capacity to process up to 32 000 parcels per hour – providing significant room for future business growth, and to support large seasonal peaks in volume. This is backed by rigorous scanning and sortation capabilities, including 6 sided scanning and street level sortation.

PLEASE NOTE:

The number of participants will be limited, with RSVPs accepted on a first-come first-served basis. Companies presenting a conflict of interest with Toll may be ineligible to attend. Participants are asked to wear safety shoes and high visibility vests as a PPE requirement on site.
